

The `xmu-beamer` Class

XMU Beamer Template

2026/05/12

This file is the documented source container for the XMU beamer class.
To generate the class file, run:

```
tex xmu-beamer.ins
```

To compile a presentation, use:

```
xelatex main.tex  
bibtex main  
xelatex main.tex  
xelatex main.tex
```

The generated class file is `xmu-beamer.cls`. Edit `xmu-beamer.dtx`, then rerun `tex xmu-beamer.ins`, rather than editing `xmu-beamer.cls` directly.
